

ACTIVE INSIGHTS: AZURE HEALTH CHECK

Gain perspective with a snapshot of your Azure

Optimise resources and prioritise cloud tasks with a read-only snapshot of your Azure environment

Receive a summary optimisation report covering costs, usage, and more.

Plan your next steps with actionable insights and recommendations.

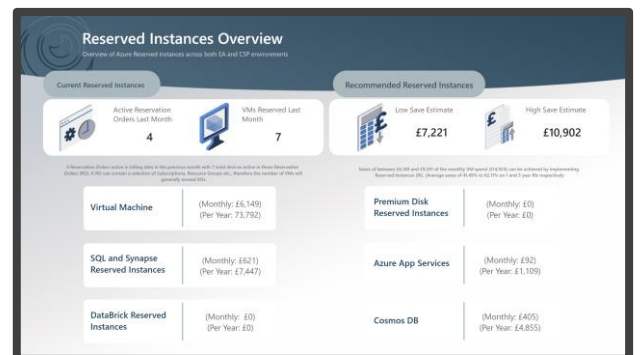

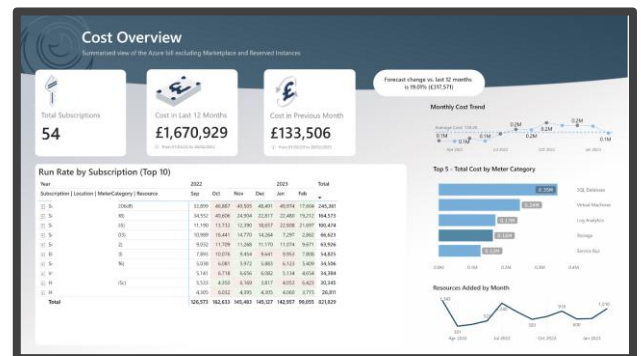

The Azure Health Check is a discreet optimisation analysis of the Azure environment, surfacing opportunities to optimise costs, resources, and cloud functionality.

Powered by Active Insight's powerful analytical capabilities, the Azure Health Check provides a summarised snapshot of potential savings opportunities - totalling an average of 17-37% - across a number of technical categories.

The Azure Health Check is free to run, requires read-only access, and is a secure means of uprooting hidden opportunities to right-size, optimise, and enhance Azure resource usage.

To maximise the value on offer, the Azure Health Check report contains both summary and deep-reaching insights - starting with a brief overview of findings and recommendations.

The report then dives below the surface to explore the cost, usage, wastage, and optimisation opportunities across highly relevant areas of Azure - including VM and storage optimisation, Kubernetes, hybrid benefits, and Azure tagging.
